

BENETEAU 473

Elegance with a purpose.

Space, style and light...blended as only Beneteau can.

Elegance with a purpose. It seems to encompass exactly what the Beneteau 473 brings to her owners. Her interior is an amazing combination of volume and light with headroom of 6'8". The panoramic deck lights - a first for any Beneteau model - flood the interior with natural light.

An optional built-in entertainment center with television/VCR, exceptional woodwork, plush settees, and increased storage make it a delight to entertain guests in the salon. And any gourmet cook would feel right at home in the 473 galley. It's fully equipped with a three-burner stove, oven, front loading refrigerator and built-in microwave. There's even a walk-in locker in the two cabin version that you may use for a pantry, workshop, or a washer/dryer.

Performance that matches her beauty.

The Beneteau 473 is above all, a bluewater sailing yacht. She performs as well as she looks cutting through the water. Designed by sailors for sailors, the twin steering stations allow for extraordinary visibility and ease of handling. Furling sails is a simple task with standard roller furling main and genoa and convenient electric winch. An optional full batten mainsail is also available. Her deck is equipped with ample handrails, wide walkways, and a resilient non-skid surface for easy and safe movement while under sail.

And perhaps the most innovative feature aboard, the cockpit table can be folded away and stowed in its own custom carrying case - leaving you a sturdy footrest and handrail.

Exquisite lines and abundant practicality.

We're very proud of the Beneteau 473. Never before has one yacht meant so much to so many sailors. For day sailors who enjoy entertaining at the dock, her beauty and functionality will make her the preferred location for drinks and dinner.

For Wednesday night racers, her performance is sure to reward your crew. For offshore sailors, her bluewater dependability and ease of sailing make it an exceptional cruising home. And for families who really want the best of both worlds, there is simply no other choice.
